

EV Charge & Range Analysis — Dashboard & Story Visualizations

Karanam Naga Venkata Sai Ganesh · Project Development Phase, Part 2

Published Tableau Public Workbook

The complete interactive workbook — all 4 dashboards, 22 worksheets, and the "Story Of EV" story — is published as a single workbook on Tableau Public:

https://public.tableau.com/app/profile/naga.venkata.sai.ganesh.karanam/viz/Book1_17844812171770/Story5

Individual dashboards (EV Buyer's Comparison Dashboard, EV Charging Infrastructure Overview — Delhi, Fleet Performance Dashboard, Electric Cars Analytics Dashboard) and story points ("Where is Delhi charging?", "How healthy is the fleet, really?", "Ravi's EV Buying Journey") are reachable from within this same published workbook using its in-app tab/story navigation, rather than as separate individual URLs.

Electric Cars Analytics Dashboard

Actual screenshot of the dashboard overview page, including the global (98) and India (9) brand-count summary cards, and the BodyStyle/Brand selectors.

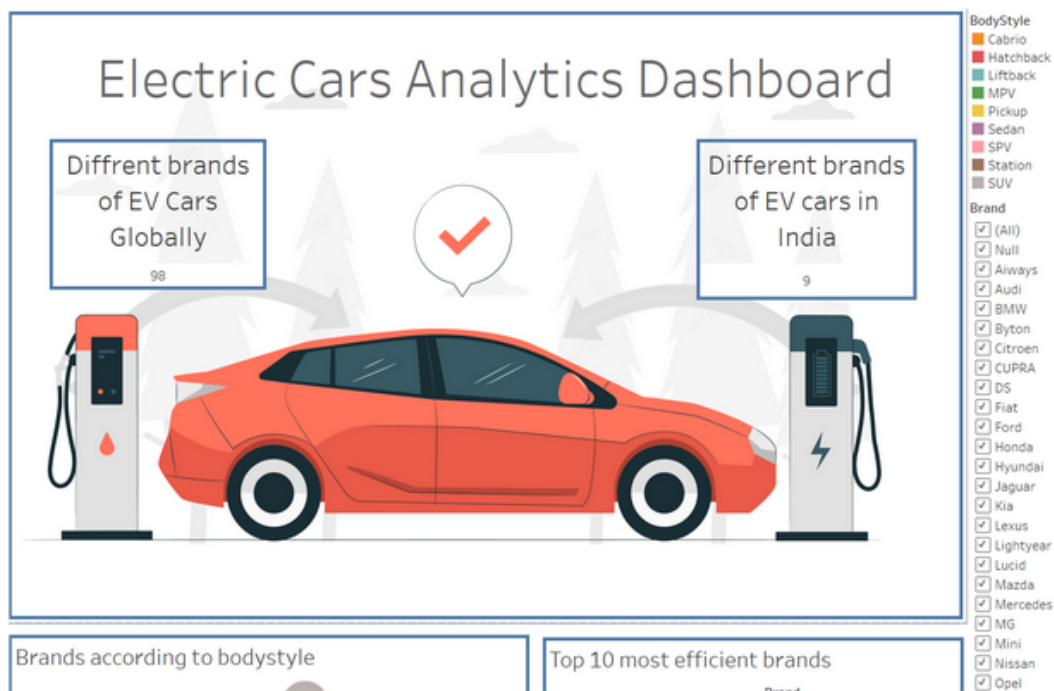

Figure 1: Electric Cars Analytics Dashboard — overview page (actual screenshot)

Detail views from the same dashboard: Brand filtered by PowerTrain type, and the Indian EV model treemap.

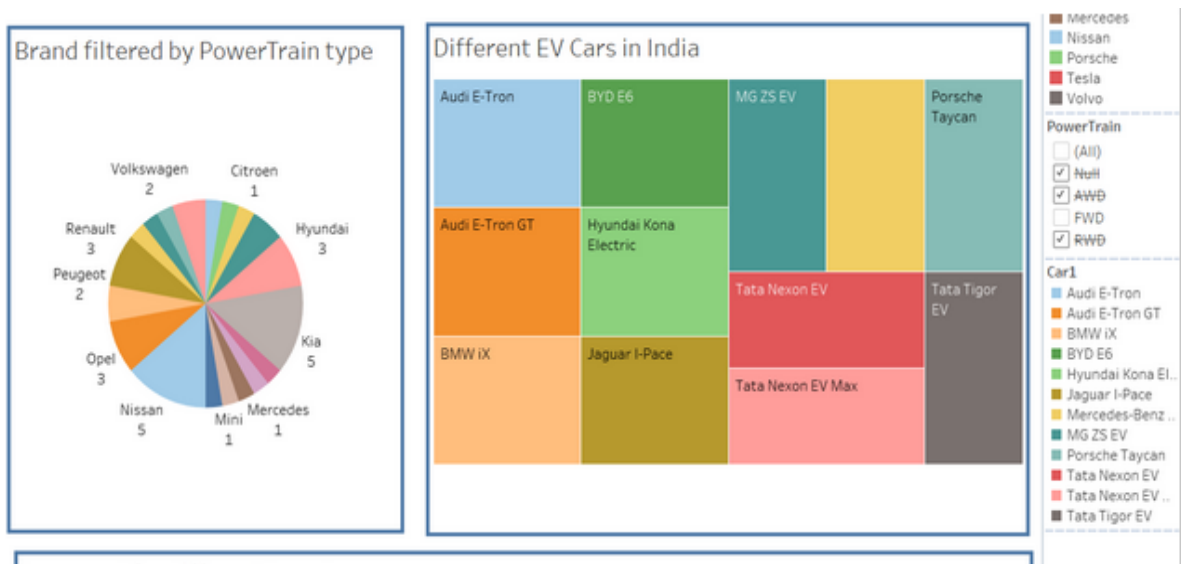

Figure 2: Brand filtered by PowerTrain type, and Different EV Cars in India (actual screenshot)

EV Buyer's Comparison Dashboard — Underlying Data Preview

A full-dashboard screenshot of this view was not available at the time of writing. The chart below is generated directly from the same underlying dataset (cleanedcheapest.csv) and shows the actual Range-vs-Price relationship the dashboard is built on, as a genuine data preview rather than a mockup.

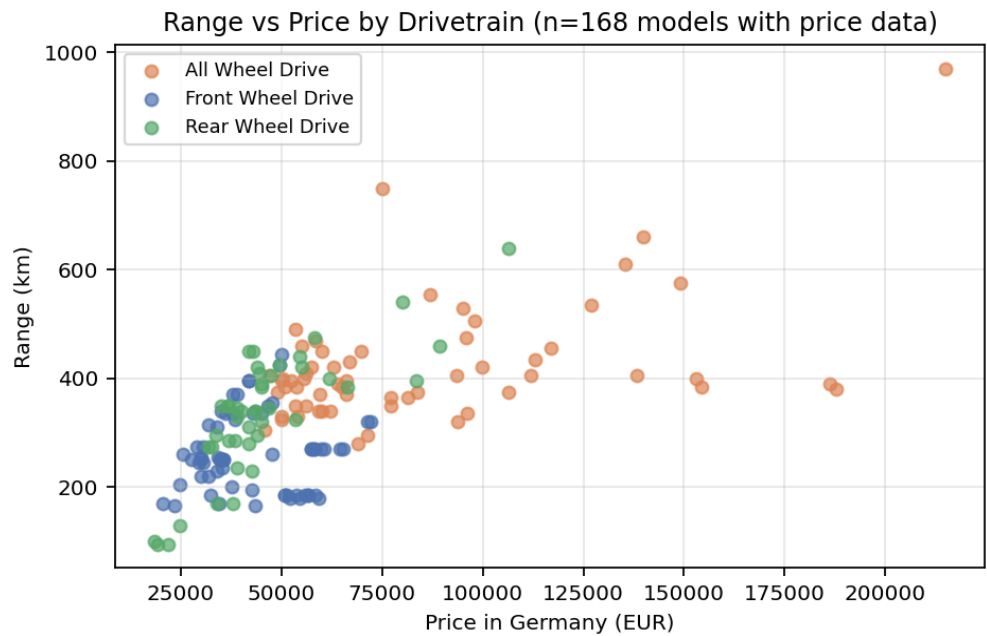

Figure 3: Range vs Price by drivetrain, generated from real dataset (data preview, not a Tableau screenshot)

EV Charging Infrastructure Overview — Delhi — Underlying Data Preview

Similarly, the chart below is generated directly from the actual Delhi charging station dataset (cleanedcharging.csv, n=168) and reflects the same station-count-by-region breakdown shown on this dashboard.

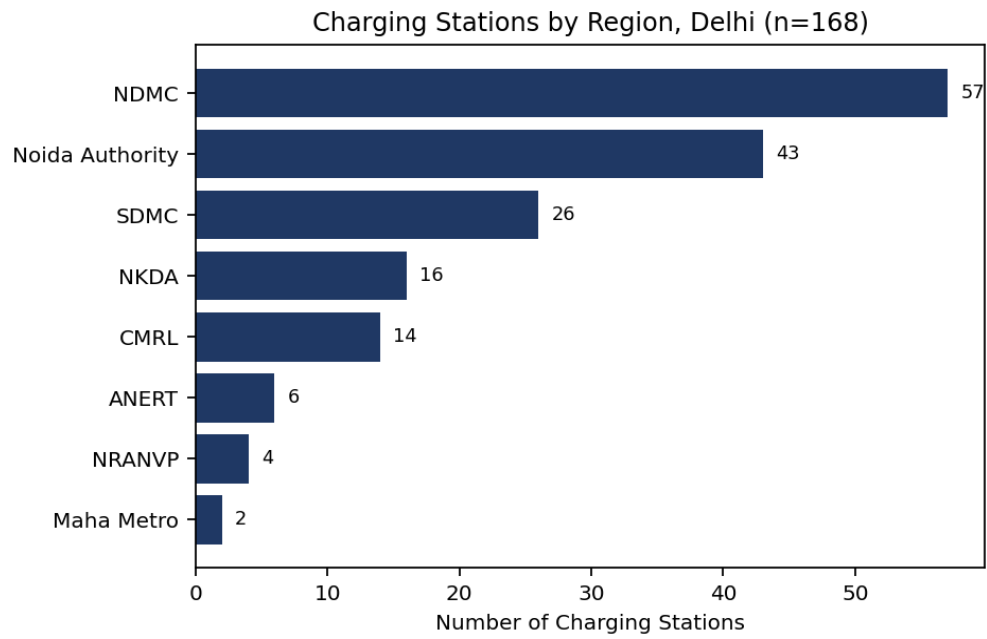

Figure 4: Charging stations by region, generated from real dataset (data preview, not a Tableau screenshot)

Fleet Performance Dashboard — Range & Efficiency — Underlying Data Preview

The chart below is generated directly from the full EV specifications dataset (cleanedelectriccar.csv, n=98) and reflects the same Range-vs-Efficiency relationship, grouped by powertrain, shown on this dashboard.

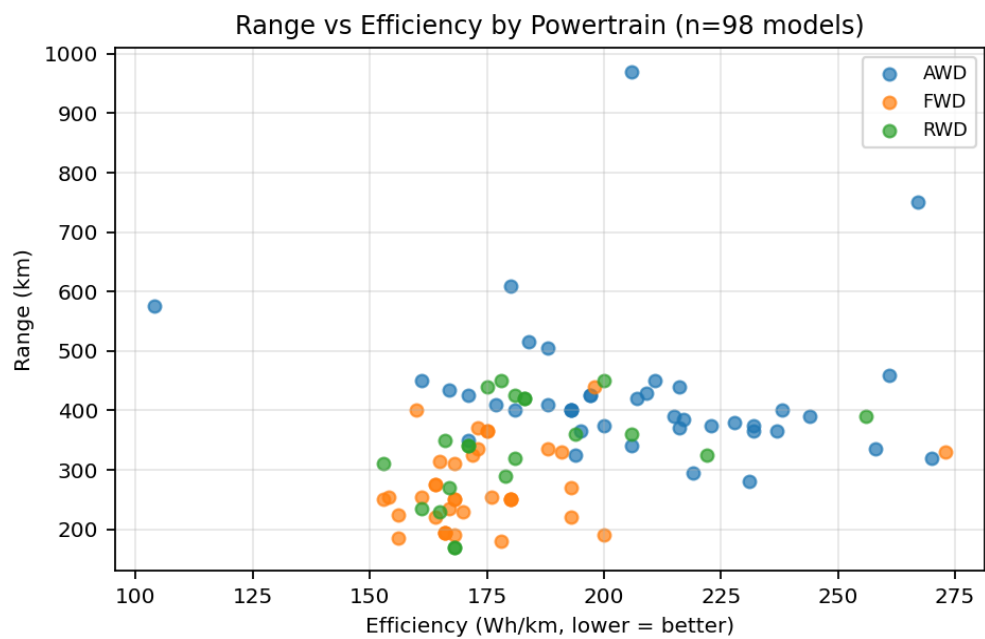

Figure 5: Range vs Efficiency by powertrain, generated from real dataset (data preview, not a Tableau screenshot)

Recommendation: replace Figures 3–5 with direct screenshots of the published Tableau dashboards once available, for full visual consistency with Figures 1–2.
